

## ✦ SPECIAL DICE

A roll with the **SLAPS** symbol allows the player to take a card of their choice. For example:

Any **red** card, regardless of symbol.

Any card with a **Tralalero Tralala**, regardless of color.

Any card of your choice, with no restrictions.

## 🏆 END OF THE GAME

The game ends when the **last card** from the pool has been taken. **The player with the most cards in front of them wins.** If there's a tie, tied players return their cards to the pool and roll the dice for a final showdown — whoever slaps the correct card first wins.

[NASTOLA.GAMES](#)

**7+** AGE  
**2-5** PLAYERS  
**10'** TIME

Contains 25 cards and 2 dice.

## OBJECTIVE

Collect **the most cards** in front of you by the time all cards from the pool have been taken.

## SETUP

Spread **all cards face-up** on the table. **Make sure** all images are **clearly visible** and not overlapping. This area is called the pool. Players take turns rolling the dice clockwise. The youngest player goes first.

## HOW TO PLAY

**1 Roll the Dice** - Roll both dice at the same time. The result is a combination of a color and a symbol (e.g., red + shark). 

**2 Find the Match** - All players search simultaneously for the card in the pool that matches the rolled combination.

**3 Slap it First** - The first player to place their hand on the correct card takes it.

Slapped cards are placed face-up in rows in front of each player, visible and accessible to all. Do not stack them.

If a player slaps the wrong card, they may immediately try again to slap the correct one.

## ATTACK & DEFENSE

If the dice roll matches a card that is already in front of a player, it can be **attacked** and **stolen** by slapping it. The current owner can **defend** the card by being the first to touch it.

The first to either attack or defend the correct card ends the round. Roll the dice to start a new round.

You may attempt to attack or defend more than one card until the matching card is slapped.

If multiple players slap the card at the same time, the one whose hand touched it first or covers the largest portion of it wins. If it's unclear, no one takes the card and the dice are rolled again.

Placing your hands over multiple cards at once is not allowed.
